<b>Office Action Summary</b>	Application No. 10/549,612	Applicant(s)  DENGLER, STEFAN	
	Examiner Jason Benton	Art Unit 3747	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Krebs.

The patent by Krebs (5,359,970) shows a cylinder head with at least one camshaft (2) on which at least one cam carrier (15) is mounted so as to be nonrotatable and axially displaceable. The at least one cam carrier has at least one cam (18) on which at least two different cam travel paths are configured. The at least one cam carrier, for the purpose of bearing the at least one camshaft, is enclosed in at least one camshaft bearing rigidly mounted on a cylinder head. A means for axially displacing at least one cam carrier in relation to the at least one camshaft between a first axial position and at least one second axial position, in that wherein in the first axial position of the cam carrier, a first contact surface rigidly mounted on a first cam carrier is in contact with a first contact surface rigidly mounted on a cylinder head, in the second axial position of the cam carrier, a second contact surface rigidly mounted on a cam carrier is in contact with a second contact surface rigidly mounted on a cylinder head. A means for applying an axial tensioning force are configured between the camshaft and cam carrier, the axial tensioning force displacing the cam carrier in the area of the first

axial position in the direction of the first axial position, and in the area of the second axial position in the direction of the second axial position.

The first axial contact surface rigidly mounted on a cam carrier and the second contact surface rigidly mounted on a cam carrier are side surfaces of the at least one cam.

The first contact surface rigidly mounted on a cylinder head and the second contact surface rigidly mounted on a cylinder head are side surfaces of at least one camshaft bearing.

The means for application of an axial tensioning force from the base camshaft to the cam carrier is configured as a detent device.

On the at least one base cam shaft a cam carrier is mounted for each cylinder of the internal combustion engine.

***Allowable Subject Matter***

Claims 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Benton whose telephone number is (571) 272-4838. The examiner can normally be reached on M-F 9:30-6:00.
